5.15.1 Necron Technology

Necron: Necron technology allows many of its units to repair themselves at an accelerated rate. This is reflected as the Necron ability in a unit's datasheet.

Units with the Necron ability that have been destroyed can regenerate. Formations can return one previously destroyed Necron unit in the end phase of each turn either on or off the board. In addition, if a formation regroups on board it can use the dice rolls to either return units with the Necron ability to play or to remove blast markers or both (e.g., if you rolled a '2' you could return 2 units to play, remove 2 blast markers, or return 1 unit and remove 1 blast marker). Formations off board are restricted to using their regroup function to remove blast markers only.

Sautekh Portals: Necron Portals are the primary means by which the Necron forces are transported across the galaxy. Any formation that is in the reserves may enter play via a portal as part of any activation that allows movement. Measure their movement using the portal as the starting point. Necron Portals can only be used by Armored Vehicles with the walker ability, Infantry, or Light Vehicles. Each portal can be used only once per turn.

Additionally formations may leave through an unused portal when moving and reenter through another unused portal on the board as part of the same movement, both portals count as having been used that turn. Necron Portals can only be used by Armored Vehicles with the walker ability, Infantry, or Light Vehicles. Portals may not be used to go back into reserves.

Formations moving through a portal of a broken formation gain a blast marker. If for any reason, at the end of the movement a unit is unable to enter the board or is found out of formation it is destroyed (see core rule 1.7.4)

Living Metal: Units made of living metal receive a Reinforced Armor saving throw against normal weapons, lance weapons, and even macro-weapons. In addition, their save is not reduced by sniper abilities. Living Metal units are permitted a single armor save against Titan killer attacks, this save has to be taken against each point of TK damage.

5.15.1 Necron Technology

Q: What happens if I have a Phalanx in reserves that fails its activation roll?

A: The formation is left with limited options through the hold action. Since shooting is not possible off board and regrouping is not allowed off-board, the Phalanx would only be able to move through an available portal or choose not to activate.

Q: If the unit of Night Scythes while landed has blast markers equal to the number of models in the unit are they considered broken?

A: Yes and No. The unit is considered broken for purposes of portal use but acts like a landed flyer in all other respects.

Q: Does a leader function allow additional units to regenerate under the Necron rule?

A: Yes, a unit with leader ability could add an additional unit with the Necron ability to regenerate back into its original formation, or remove an additional Blast Marker as per the core rules. Just as with regular leader units, this function is cumulative.

Q: Can a Monolith that is part of a broken formation still use its portal?

A: Yes, as long as it has not been used already during the current turn. The same rule applies to Abattoirs and Warbarques and their respective portals.

Q: Can a Necron portal be blocked?

A: As with Eldar portals, there are differing viewpoints on how to handle blocked portals. The current NetERC ruling is that if a portal is covered by an enemy's Zone-of-Control, the formation exiting the portal would be forced to assault that enemy, moving into base-to-base contact, and then resolving the attack. Tacticalwargames.net has an active Epic community where rules questions are posed and discussed. It is our recommendation that you cover this subject with your opponent during the warm-up phase of your game.

Q: If a formation is using the portal of a broken formation to move to a different portal on the board that is also broken do I get only one BM?

A: No you get a BM for each portal used if that portal is on a formation that is broken. In this case the moving unit would get 2 BMs.

SPECIAL RULE

5.15.2 Implacable Advance

The Necron are an offensive army, always on the advance, stopping only to eliminate enemy positions before moving on to harvest others. While subject to disruption from losses and enemy fire, the mechanical nature of the Necron permits them to easily reorganize to maintain the offensive momentum.

Necron formations receive a +1 bonus to Marshal Actions. Due to their steady, deliberate, nature Necron formations cannot take a March action.

5.15.4 Ponderous

Units with this rule are very slow even by necron standards. When broken they may only make a single withdrawal move, not the usual two.

TOURNAMENT PLAY

Necron Army Epic Tournament Special Rules

Necron Reserves

Any Necron formation may be held back “in reserve” (with the exception of the Aeon Orb and Abattoir) if you are playing the Epic Tournament scenario. Note that formations that do not have the Teleport ability will only be able to enter play through Portals. Any Necron formation in the reserves for any reason (either because it has not yet entered play or it is broken) is considered destroyed for the purpose of tiebreak, or the Break Their Spirit victory condition.

Garrisons

The Necron typically act in an offensive manner and as such, their formations may not garrison in the Epic Tournament scenario unless fielding a Tomb Complex Necron Individual. To represent that a Tomb may contain active Necron, the player may choose to garrison up to two Phalanx formations at the Tomb Complex.

Sautekh Legion Army List

Sautekh Legion armies have a strategy rating of 2. All formations have an initiative rating of 1+. The *Implacable Advance* rule (5.15.2) apply to all Necron formations.
